Gibson Les Paul **Content Outline**

I want to build a site memorializing the beautiful Gibson Les Paul guitar. I think it will be a two-page site, with the first being a history and influence page, while the second is a page solely dedicated to beautiful photos of the guitar, organized compellingly.

Page 1:

1. History
 - a. Guitarist Les Paul set out to design a guitar to compete as a mainstream guitar manufacturer alongside Fender and their telecaster and Stratocaster model
 - b. Highly desired 1958-60's were initially thought to be a failure, but are now one of the most expensive vintage guitars on the market
2. Identity of Gibson
 - a. Known for their use of a mahogany guitar body and neck
 - b. Includes a rosewood fretboard
 - c. Also includes two of the iconic P-90 single-coil pickups
 - d. Made their debut in 1952 at the Paramount Theater in New York
3. Beautiful Colors
 - a. The les paul is known for having its distinct burst style
 - b. The burst style came in many different colors (sun, tobacco, cherry, coffee, and many more)
4. Famous and recognizable people who have played and loved the guitar

Page 2:

1. Photos of the guitar
2. Photos of famous and influential musicians playing it
3. Sources
